### **What is EDMsixInside™?**

*EDMsixInside™* is what you need for commercial distribution of desktop applications with *EDMsix™* library functionality. *EDMsixInside™* is basically an embeddable license key for standalone desktop applications and an *Embedded Software License Agreement* to govern its commercial use. When the license key is embedded in your source code, it removes the hardware binding of the *EDMsix™* development libraries.

---

### **How do I get EDMsixInside™?**

Firstly, you need to purchase the Software Development Kit, *EDMsdk™*, that corresponds to the functionality that you want to distribute. When you are ready to distribute, you contact *Jotne Help Desk* to have the *Embedded Software License Agreement*.

---

### **How is the price of EDMsixInside™ calculated?**

Several pricing models may apply, but normally it is based on the number of *Embedded Software Licenses* (ESL) you need. An ESL is a named application on a given platform. That is, the application marketed as *MyApp™* on Windows 64 bit and Linux would require two ESL.

---

### **Can I provide Software as a Service (SaaS) under EDMsixInside™?**

No. *EDMsixInside™* applies to desktop applications only. Web based services based on *EDMsix™* is possible, but requires an other type of agreement based on other parameters than ESL. Contact *Jotne Help Desk* for more information about the solutions available.

**Can I have *EDMsixInside™* without a *Maintenance and Support Agreement (MSA)* for *EDMsdk™*?**

No. For as long as you distribute your application(s) under *EDMsixInside™*, MSA for the corresponding *EDMsdk™* product is mandatory. This is to ensure that you will receive the best assistance from the *Jotne Help Desk* in case your end users encounter unexpected problems.

---

**Does the *EDMsixInside™* price depend on territory and volume sold?**

No. *EDMsixInside™* is world wide and for unlimited volume.

---

**What do I do if I need more ESL?**

The Appendix B of the ESLA is replacable. That is, if you need to add or remove an ESL from your ESLA, simply fill in a new Appendix B, sign it and send it to the *Jotne Help Desk*. The annual invoice will be updated accordingly at the next renewal.

---

**How do I pay for *EDMsixInside™*?**

The cost for the ESL covered by your ESLA will be included in the annual invoice for renewal of your *Maintenance and Support Agreement*.

---
